

Pipeline Script:

```
pipeline {
  agent any
  stages {
    stage('Build Docker Image') {
      steps {
        script {
          echo "Building Nginx Docker Image from the specified directory"
          // Specify the path to the directory where your Dockerfile is located
          sh 'docker build -t my-nginx-image
C:/Users/chira/OneDrive/Desktop/Sem3/DevOps/m2'
        }
      }
    }
    stage('Run Docker Container') {
      steps {
        script {
          echo "Running Nginx Docker Container"
          // Run the Docker container using the newly built image
          sh 'docker run -d --name nginx-container -p 8081:80 my-nginx-image'
        }
      }
    }
    stage('Verify Docker Container') {
      steps {
        script {
          echo "Verifying Nginx Docker Container is running"
          // List running containers to verify the Nginx container is up
          sh 'docker ps'
        }
      }
    }
  }
}
```

```

}

}

}

```

```
